An introduction to the theory and practice of financial simulation and optimization.

In recent years, there has been a notable increase in the use of simulation and optimization methods in the financial industry. Applications include portfolio allocation, risk management, pricing, and capital budgeting under uncertainty. This accessible guide provides an introduction to the simulation and optimization techniques most widely used in finance, while at the same time offering background on the financial concepts in these applications. In addition, it clarifies difficult concepts in traditional models of uncertainty in finance, and teaches you how to build models with software. It does this by reviewing current simulation and optimization methodology—along with available software—and proceeds with portfolio risk management, modeling of random processes, pricing of financial derivatives, and real options applications. Contains a unique combination of finance theory and rigorous mathematical modeling emphasizing a hands-on approach through implementation with software.

Highlights not only classical applications, but also more recent developments, such as pricing of mortgage-backed securities. Includes models and code in both spreadsheet-based software (@RISK, Solver, Evolver, VBA) and mathematical modeling software (MATLAB).

Filled with in-depth insights and practical advice, Simulation and Optimization Modeling in Finance offers essential guidance on some of the most important topics in financial management.

Robust Portfolio Optimization and Management, Frank J. Fabozzi, Petter N. Kolm, Dessislava Pachamanova, Sergio M. Focardi, Aug 10, 2007, Business & Economics, 512 pages. Praise for Robust Portfolio Optimization and Management: "In the half century since Harry Markowitz introduced his elegant theory for selecting portfolios, investors and.

Advanced Bond Portfolio Management Best Practices in Modeling and Strategies, Frank J. Fabozzi, Lionel Martellini, Philippe Priaulet, Mar 8, 2006, Business & Economics, 576 pages. In order to effectively employ portfolio strategies that can control interest rate risk and/or enhance returns, you must understand the forces that drive bond markets, as well.

Interest Rate, Term Structure, and Valuation Modeling, Frank J. Fabozzi, Dec 13, 2002, Business & Economics, 514 pages. This ultimate guide contains an excellent blend of theory and practice. This comprehensive guide covers various aspects of model building for fixed income securities and.

The Complete CFO Handbook From Accounting to Accountability, Frank J. Fabozzi, Pamela Peterson Drake, Ralph S. Polimeni, Feb 4, 2008, Business & Economics, 896 pages. This must-have reference covers all of the major areas of cost accounting and analysis including product costing, relevant costs, cost-volume analysis, performance evaluation.

Collateralized Debt Obligations Structures and Analysis, Laurie S. Goodman, Frank J. Fabozzi, Oct 2, 2002, Business & Economics, 374 pages. The collateralized debt obligation market has seen explosive growth in the last few years. To help you keep up with the expanding CDO market and its various instruments, Laurie.

The Handbook of European Structured Financial Products, Frank J. Fabozzi, Moorad Choudhry, Mar 4, 2004, Business & Economics, 800 pages. The first comprehensive account of the European structured financial products market. This comprehensive survey of the securitization market in Europe covers all asset-backed.

Professional Perspectives on Fixed Income Portfolio Management, Volume 2, Frank J. Fabozzi, 2001, Fixed-income securities, 288 pages. Frank Fabozzi leads an international team of fixed income experts in analyzing subjects varying from active portfolio management against an index to credit analysis and debt.

How to prepare for the Armed Forces Test--ASVAB, Armed Services Vocational Aptitude Battery, Barron's Educational Series, Inc. Editorial Dept, May 1, 1992, Study Aids, 549 pages. Presents four full-length practice exams, reviews subtests, and suggests study guidelines.
